Source: U.S. Census Bureau, 2010 Census Redistricting Data (Public Law 94-171) Summary File

* Note: The population deviation is the number of persons over and under the ideal population

** Note: The ideal population population is calculated by dividing the total population into five equal districts

*** Note: Ethnicity is not counted by the Census Bureau as a racial category; therefore, the Hispanic population is not added to the racial group population to obtain total population
